

Beauty and Speed

Beauty is the perfect esthetic result. But Beauty is more: It is to exceed your patients' expectations after the treatment: Beautiful teeth and a radiant smile – we are well aware of the individual expectations of every patient. However, one thing is true for all patients: They want to feel good with their “new” teeth. A success story needs products that fulfill the requirements.

Speed help you to speed up the smile of your patients. Be fast and efficient and shorten treatment times while at the same time reaching the best economic result for your patients.

BEAUTY and SPEED are the topics of this conference with selected speakers. Join us on the way to success and let us work together to give an increasing number of patients the benefits of modern dentistry.

Pris: 950 kr. pr. person inkl. moms.

Godkendt af TF til 6 timer ifølge de nye regler for efteruddannelse.

Beauty and Speed 2010

på Sørup Herregaard – Ringsted

2

Konference

den 12. marts

Welcome to the

2. Beauty and Speed

2010

Tidsplan for d. 12. marts

Fredag kl. 10⁰⁰–17⁰⁰

Åbent for registrering fra kl. 09⁰⁰

Sørup Herregaard

Sørupvej 26, 4100 Ringsted – DK

FOREDRAGSHOLDERE

TANDLÆGE SVENNE BECH

Dimitteret fra Århus Tandlæge Skole i 1981. Har siden 1992 beskæftiget sig med implantologi. Mangeårigt medlem af DSOI og EAO. Videreuddannet på kurser i hele Europa samt USA. Har undervist for Nobel i: "Guided surgery/Teth in an Hour". Startede i 2004 Aros Implantatklínik, der modtager henvisninger inden for Implantologi, GBR, CT-scanning, helnarkose og alm. kirurgi.

ANVENDELSE AF KNOGLESUBSTITUTTER I FORBINDELSE MED GBR, INDIKATIONER OG PRAKTIK

Foredraget vil fokusere på at bibringe et overblik over Guided Bone Regeneration – hvor står vi i dag? Specielt vil anvendelse omkring implantatbehandling blive diskuteret, men også mulighederne inden for parodontologien bliver berørt. Foredraget vil være klinisk relateret med eksempler fra den daglige praksis. (Dansk)

DR. THOMAS HANSER

Assistant Medical Director of Prof. Khoury,
Clinic Schloss Schellenstein, Germany
Specialist in Oral Surgery
Master of Oral Medicine in Implantology

BIOLOGICAL AND CLINICAL FACTORS FOR ULTIMATE IMPLANT AESTHETICS – GUIDELINES FOR SUCCESSFUL BONE AND SOFT TISSUE AUGMENTATION

Soft tissue management remains an important factor for natural aesthetic outcome and for the good healing of the grafted area. Passive and tension-free soft tissue closure and the use of innovative techniques e.g. pedicled palatal connective tissue flap or tunnel technique are playing an important role to reduce complications. The use of various flap designs and soft tissue augmentation techniques can help to make bone grafting procedures predictable and to get satisfaction with the aesthetic result. The presentation integrates evidence based biological principles with practical aspects in hard and soft tissue augmentation plus implant design to optimise long-term stability and aesthetic results. (Engelsk)

DDS. PH.D KIRSTEN WARRER

Associate Professor, Dep. of Periodontology Royal Dental College Aarhus
Private reference practice in Periodontics
EFP representative and board member Danish Society of Periodontology

PARODONTALBEHANDLING FREMFØR EXTRACTION

Hvor går grænserne for hvilke parodontallæsioner, der kan behandles? De biologiske grundlag for helingen i de marginale væv vil blive gennemgået. Hos hvilke patienter kan det være hensigtsmæssigt at udføre regenerationsbehandling med membraner og knogle, i stedet for ekstraktioner og implantatbehandling? En stadig stigende dokumentation for implantaters ringere successratio i parodontitispatienter bør få os til at fokusere på adækvat behandling af selv svære parodontale læsioner. (Dansk)

DR. ORCAN YÜKSEL

Studied dentistry at Johann Wolfgang Goethe University in Frankfurt, graduated in 1987. Since 1993 operating his own dental practice, specializing in dental aesthetics and oral implantology. Trainer by the European Association of Dental Implantologists (BDIZ EDI). Member of several German dental societies (DGI, BDO, DGZMK, DGZI, DGP). Certified ICOI Diplomate and founding member of the Turkish Academy of Aesthetic Dentistry (EDAD).

NEW TRENDS AND PROVEN CONCEPTS FOR CHALLENGING CASES IN THERAPY WITH IMPLANTS

Whether the smallest gap or edentulous jaw, esthetical demanding single crown or implant-supported prosthesis – Treatment protocols are as individual as our patients needs. The new knowledge on implant treatment set some standards over almost two decades in clinic and lab. But the knowledge is still growing. All over the world oral surgeons, dentists and prosthodontists are looking for solutions for challenging cases. Do immediate implantation and late implantation or flap and flapless surgery have the same success rates? And what is success? The diagnostics and treatment planning of dental implants in the aesthetic zone will be described. The presentation will provide insight into possibilities and limitations of GBR techniques. The clinically proven treatment protocols will be shown for predictable results. (Engelsk)
